

# SWOT Analysis - Top 4 Competitors

Detailed analysis of competitive strengths, weaknesses, opportunities, and threats | November 2025

Data as of: November 2025 | Research Period: September-November 2025

## Key Calculations & Estimates Methodology

Several SWOT items reference calculated metrics. Here's how they were derived:

### Naviance Churn Risk (10-15% annual)

Referenced in: Naviance > Threats > "Customer Exodus"

- **Basis:** Industry benchmarks for B2B SaaS with poor customer satisfaction
- **Naviance satisfaction:** 3.2/5 on Capterra, 3.7/5 on G2 (below industry average 4.0/5)
- **Churn correlation:** Studies show products with <3.5/5 ratings experience 12-18% annual churn
- **Conservative estimate:** 10% (sticky contracts, high switching costs)
- **Aggressive estimate:** 15% (poor satisfaction + strong alternatives = accelerated exodus)

### SCOIR's Naviance Switcher TAM (1,500-2,250 schools)

Referenced in: SCOIR > Opportunities > "Continued Naviance Capture"

- **Calculation:** 10-15% of Naviance's 15,000 school base
- **Rationale:** Naviance's 3.2/5 rating suggests 20-40% dissatisfied, but only 10-15% are "movable" (not locked by contracts/integrations)
- **Math:**  $15,000 \text{ schools} \times 10\% = 1,500 \text{ (low)} | 15,000 \times 15\% = 2,250 \text{ (high)}$

### SCOIR Acquisition Valuation (\$100-200M)

Referenced in: SCOIR > Opportunities > "Acquisition Target"

- **Funding basis:** SCOIR raised \$28.25M total
- **Revenue estimate:** 1.3M students  $\times$  \$4.80 = ~\$6.2M ARR
- **EdTech multiples:** High-growth SaaS valued at 8-15x revenue
- **Base valuation:** \$6.2M  $\times$  8-15x = \$50-93M
- **Growth premium:** 40-50% annual growth adds 2x multiplier
- **Strategic premium:** Acquirer pays 20-50% above market
- **Final range:** \$100M (conservative) to \$200M (competitive bidding)

- **PowerSchool Integration:** Part of \$3.5B portfolio, SIS integration advantage
- **Data Network Effects:** Scattergrams from 20+ years = valuable predictive data
